Financial Inclusion of Micro, Small and Medium Enterprises in Zimbabwe

May 2022
Belinda R. Chaora
Demographics

Our data shows that ownership of micro enterprises is evenly distributed between men and women with founders from each gender constituting 50%. However, the percentage of women’s ownership decreases as the size of the enterprise grows suggesting that women entrepreneurs are more likely to own smaller enterprises compared to men.
Our data shows that micro enterprises are prominently involved in retail, vending and agriculture sectors.

Sectors such as tourism, logistics, manufacturing, textile, and apparel take up larger proportions of the medium enterprises.

71% were micro enterprises

44% of enterprises were founded in the last 5 years (2017-2021)
The distribution of compliant and non-compliant enterprises is almost equal (~50%).

It is paramount to note that up to 89% of enterprises felt some form of restriction to compliance.

**Micro enterprises restrictions**
- 40% restricted by cost
- 19% do not know how to register

**Small enterprises restrictions**
- 33% restricted by cost
- 26% discouraged by lack of simplicity and accuracy in company registration law

26% of compliant enterprises had a founder whose highest level of education was Secondary O Level.

52% of enterprises were not registered.

89% of restrictions were faced by micro enterprises.

All medium enterprises were registered.
Banking

Only 36% of all enterprises interviewed have access to a bank account. The remaining 64% had different reasons for not having bank accounts. A substantial proportion of enterprises (31% of urban and 22% of rural) do NOT have bank accounts because the business is not legally registered.

There are more enterprises with bank accounts in Matabeleland South (57%), followed by Harare (44%) and Mashonaland East (43%). The lowest access to bank accounts is evident in Masvingo (18%) followed by Midlands (25%), and Mashonaland Central with 27%.

Micro enterprise restrictions
- 24% not legally registered
- 18% say charges are too high
- 14% do not trust the security protocols

77% of rural MSMEs do not have a bank account

75% of MSMEs owned by women do not have a bank account

20% of micro enterprises have a bank account
Mobile Money (MM)

- 97% of all MSMEs that use mobile money make use of Ecocash at some point, 30% use ZIPIT Smart and up to 19% will use One Money.
- Of the 58% of enterprises with a mobile money account, 73% use their accounts every day.
- The provinces which demonstrate lower rates of mobile money access are Midlands, where only 17% have access, followed by Masvingo where only 37% have access.

Reasons MSMEs do not have MM accounts
- 49% only do cash transactions
- 9.6% say charges are too high
- 8% do not trust security protocols

66% of small enterprises have a mobile money account

58% of enterprises have a mobile money account

50% of Urban MSMEs do not have a mobile money account

66% of small enterprises have a mobile money account
Sources of funding for business operations

Funding to start business

- 80% of founders used their personal savings to start their businesses. Informal relationships are more significant for enterprise development in Zimbabwe than relationships with financial institutions. For instance, 11% of the respondents secured funds from family and friends to finance their start-ups whilst another 11% secured funding from income savings and lending groups. A tenth of the sample (10%) secured funding from fellow business colleagues.

Funding for on-going business

- Founders relied on their own savings and own initiatives to keep their businesses afloat (see Figure 37 below). This of course makes them more susceptible to economic shifts making it easier for their enterprises to fail. Founders also rely on networks such as savings and lending groups (8%), family and friends (8%), remittances (6%) and fellow business colleagues (7%).
Loan applications

- Only 14% of small enterprises in Zimbabwe make loan applications to formal entities like banks or microfinance institutions with the hope of receiving funding as they attempt to get into business.

Reasons for not applying for loan
- 36% cannot access loans at their bank
- 11% had insufficient documentation

Reasons for loan rejection
- 30% did not have strong enough cash flow
- 25% did not meet collateral requirements
- 16% had incomplete paperwork
Insurance and Pensions

• 81% of enterprises did not have access to insurance products and services. The most common type of insurance accessed by MSMEs is vehicle insurance.

Reasons for not having insurance
1. Lack of awareness (21%)
2. Not seeing the value (13%)
3. High cost (10.8%) and inflation (10%)

• Only 7% of enterprises have accessed pension schemes for their workers. The distribution based on location displays that there is a higher likelihood of urban enterprises (12%) making pension schemes available to their workers as compared to rural-based entities (8%)

97% of micro enterprises do not have pension policies
92% of micro enterprises did not have business insurance

113 small enterprises did not have vehicle insurance
Savings, Investments and Capital Markets

60% of small enterprises have a savings facility whilst only 44% of micro enterprises have a savings facility. Despite the challenging and unstable economic circumstances, 51% of enterprises with savings indicated they still prefer to keep their savings through a bank, whilst 26% prefer to buy foreign currency, 14% will invest in other businesses and only 4% will use the stock market to purchase shares.

Only 35% of enterprises have access to some form of business investment. MSMEs prefer to purchase fixed assets (61%) or use a bank and bank products (21%), make investments using an informal group/ISAL (Informal Savings and Lending) (13%)

Investment challenges for small enterprises
- challenges with partnership (45%)
- challenges with cash flows (39%)
Access to Information

- The majority (64%) comprised mainly of micro enterprises, and they use informal sources of information, whilst 18% use formal sources of information and 17% use a combination of formal and informal sources of information.

- Informal sources were mostly noted in business owners with secondary school qualifications at Ordinary Level (78%), at Advanced Level (75%) and at Primary School Level (74%).

64% of MSMEs use informal sources for business information

21% of men owned enterprises use formal sources for business information

72% of micro enterprises use informal sources of information

14% of rural enterprises use formal sources for business information
Level of Knowledge of Financial Products and Services

- ‘nonexistent’, ‘poor’, or ‘very poor’
  - Pensions
  - Loans from commercial banks and ISALs
  - Investments and capital markets
  - Business insurance products

- ‘average’, ‘good’, or ‘very good’
  - Banking services
  - Mobile money services
Summary

The study investigated the level of financial inclusion of Micro, Small and Medium Enterprises in Zimbabwe. We determined that the key factors that affect access to ‘formal financial products and services’ are not evenly distributed in Zimbabwe’s ten provinces. We noted that the barriers to inclusion for small enterprises can be summed up as a lack of flexible and affordable financing, harsh compliance laws and lack of information on the best fit for using and sourcing financial products and services. Addressing these three concerns for targeted groups such as youth, women and founders in marginalised areas will create more inclusive systems that promote access amongst MSMEs.
Conclusion

Promoting products and services alone is not sufficient to promote inclusion. The products and services must be innovative in form and function to address the needs of key groups. Alongside innovative financial services, information access for all groups will widen the options available for MSMEs and promote innovation and risk-taking by local enterprise founders.
